Description of Property and Eligibility Determination: *(Use continuation sheet if necessary and attach map and photo)*

**Building Description**

Building 1622 is situated near the center of Andrews Air Force Base (AFB), west of the main runways. It was built in 1952 and is a roughly ell-shaped building comprised of two hipped-roofed rectangular blocks connected at the northwest corner by a gable-roofed section. The two-story barracks building is wood frame covered with a wood composite siding. The east ell and the south ell are nearly identical. The building stands on a poured concrete foundation and has an asphalt-shingled hip and gabled roof. Building 1622 is the easternmost of three nearly identical buildings (Buildings 1620 and 1621). Of the three it appears to be the most deteriorated, and is scheduled for demolition. Built as dormitory-style housing, the building continued as base housing until the late 1980s. It has been converted into office space and currently houses offices of Special Air Missions (SAM) and the 99<sup>th</sup> Airlift Squadron (AS).

**Eligibility Determination**

Building 1622 is not eligible for listing in the National Register of Historic Places. It was built during the Cold War and functioned as dormitory housing. Therefore, the building is not directly related to Cold War military defense functions that correspond with the historic contexts previously identified as significant in the history of Andrews AFB. In

addition, the building has been modified into office space for Andrews AFB and is in a deteriorated state. The building is not associated with famous persons, is not representative of a distinctive architectural style, and is not likely to yield information important to history. Integrity of design and materials has been compromised.

The buildings at Andrews AFB are being evaluated for significance during the Cold War era in general, from 1946 to 1989, under the contexts of air defense, and special missions airlift operations. Most of the mission-specific Cold War resources were constructed by 1962, except for an alert hangar in 1985 and presidential Air Force One's hangar in 1987. An architectural survey of most of the non-residential Cold War-era buildings at Andrews AFB has been completed (Weitze 1996). Only one building was recommended eligible, an Air National Guard alert hangar built ca. 1948, which later was found ineligible by the Air Force and MHT.

The Air Force issued interim guidance for Cold War significance evaluation studies in 1993. The Air Force requires Cold War properties found eligible for the NRHP under the above contexts to have a direct relationship to "operational missions and equipment of unmistakable national importance." Family housing, maintenance shops, base exchanges, and other general support buildings are typically excluded by the Air Force.

Historical Context

On May 2, 1943, Camp Springs Army Airfield became operational on the site of Andrews AFB in rural Prince Georges County, Maryland. The homes and commercial buildings on the site were, for the most part, removed to make way for airfields, barracks, mess halls, and motor pools as the landscape was redesigned to meet military needs. Between autumn 1942 and mid-1943, the Corps of Engineers erected 4 runways, 14 miles of taxiways, and supportive buildings and infrastructure at the Camp Springs site. A small number of existing historic resources, remaining from earlier use of the land were incorporated into the base facilities. The installation witnessed a second building phase between September 1943 and April 1945, providing more extensive operating facilities and base housing. Into the spring of 1944, the mission of Camp Springs Army Air Field was chiefly to provide operational training for fighter aircraft pilots and crews before their overseas assignment. The base was renamed Andrews Army Air Field in 1945, in honor of Gen. Frank H. Andrews. Two years later, Andrews Army Air Field became Andrews Air Force Base, with the establishment of the Air Force.

The U.S. entered into the Korean War in mid-1950. Continental Air Command (CONAC) federalized 15 Air National Guard (ANG) squadrons for immediate air defense duty in February 1951, including the 121st ANG at Andrews AFB. During the Korean War, Air Defense Command (ADC) augmented the ANG alert area with the initiation of construction of a separate ADC readiness area, including two readiness/maintenance hangars and a readiness crew facility. Immediately after the conflict, ADC added munitions storage.

From 1954 to 1956, ADC erected an Aircraft Control & Warning (AC&W) command and control center, one of the last of 16 built in the U.S. Erected in a secured cluster at the rear of the ADC readiness area, the AC&W command and control center at Andrews AFB was one of five that enhanced the original 11 completed in 1952, with the augmentation intended to fill air defense intelligence, communication and command needs. The Air Force Systems command located at the base in 1957. At the turn of the decade, during 1960-61, the AC&W command and control center ceased its role, replaced by the next-generation command and control for the air defense of the Washington, D.C. air sector, the SAGE direction center at Fort Lee, Virginia. By 1961, the Military Air Transport Service's flying mission had been transferred to Andrews AFB from National Airport, and Andrews became the official home of the presidential transport aircraft, Air Force One. Andrews AFB also began to oversee the arrival and departure of foreign dignitaries during the 1960s.

As part of the Air Force reorganization in 1976, the 76th Airlift Division and the 1st Air Base Wing were moved from Bolling AFB to Andrews AFB. The 76th Airlift Division later became the 1776th Air Base Wing (ABW). In 1991, the 1776th ABW and the 89th Military Airlift Wing (MAW) were combined into the 89th Airlift Wing (AW), the current base host. The 121st ANG continues at Andrews AFB, still strongly active today as the Washington, D.C., ANG, and now partly occupying the former ADC readiness area as well as its own historic and contemporary facilities.

## 7. Description

Inventory No. PG: 77-80

---

### Condition

excellent     deteriorated  
 good         ruins  
 fair          altered

---

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

Building 1622 is situated near the center of Andrews Air Force Base, west of the main runways. It was built in 1952 and is a roughly ell-shaped building comprised of two hipped-roofed rectangular blocks connected at the northwest corner by a gable-roofed section. The two-story barracks building is wood frame covered with a wood composite siding. It is deteriorating and scheduled for demolition.

The building stands on a poured concrete foundation and has an asphalt shingled hip and gabled roof. Below the roofline is a large boxed soffit clad with the same material as the walls. The wall surface is articulated by corner boards and a horizontal board that delineates the two stories.

The east ell and the south ell are nearly identical. The east end of the east ell and the south end of the south ell are both one bay wide and feature first and second story flat metal doors, those in the second floor accessed by a metal stair. Both ells are four bays deep, with single pane wood awning windows. Basement windows have semicircular metal window wells. Near the northwest corner of the building, both ells feature a projecting bay that is concrete block. The west wall of that on the northern ell, and the north wall of that on the south ell are mirror images, both featuring four-light wood sash windows and flat metal doors topped with flat canopies. There is an additional entry near the left side of the west elevation. This is comprised of a set of double glass and metal doors.

Building 1622 is the easternmost of three nearly identical buildings (Buildings 1620 and 1621). Of the three it appears to be the most deteriorated, with portions of its cladding coming off. Inside, the rooms are oriented along a central corridor. The rooms along the corridor are only partially enclosed. Dropped ceilings have been added. The building is landscaped with lawn, planting beds, and low shrubs.

Built in 1952 as dormitory-style housing, the building continued as base housing until the late 1980s. It has been converted into office space and currently houses offices of Special Air Missions (SAM) and the 99<sup>th</sup> Airlift Squadron (AS).

# 8. Significance

---

### Verbal boundary description and justification

See attached map of Andrews AFB. Updating the Integrated Cultural Resources Management Plan (ICRMP) for the base. This inventory will be an appendix in the ICRMP. Inventoried buildings that have not previously been inventoried, and are, or will be, fifty years of age by 2006. Some Cold War-era buildings had been inventoried (Weitze 1996) but MIHP and DOE forms had not been completed; revisited these buildings and filled out MIHP and DOE forms.
