Description of Property and Eligibility Determination *(Use continuation sheet if necessary and attach map and photo)*

Constructed in 1921, this L-plan vernacular frame farmhouse has undergone several generations of additions and remodeling, and shifted orientation to the road following subdivision of this small court off Indian Head Highway. Such subdivision of small twentieth century farm parcels characterizes the local area, representing the response to intensified suburbanization of the study area following the construction of MD 210 and related to the expansion of federal offices and military installations in the county. This two-story house features a steep, intersecting gabled roof with an exterior brick chimney end now facing the street. Modern double hung windows pierce the aluminum sheathed walls, and a modern one-story addition fills the area between the intersection house sections.

Research has not revealed any association between this structure and events that have made a significant contribution to the broad patterns of our history (Criterion A) or the lives of persons significant in the past (Criterion B). The building is not a good example of any style; nor is it distinguished; it does not represent the work of a master or display high artistic merit (Criterion C). Although archeology was not addressed in this study, there is no indication
