

directly attributed to a specific mail-order company.

Capsule Summary

Inventory No. PG: 80-29
Property Name: Kaydot Circle Survey District
Address: 7707 Kaydot Road
City: Fort Washington
Date of Construction: 1932

Description (Summary):

The parcel is owned by one owner. All the houses may be Sears mail-order homes. Individual buildings have experienced substantial alterations, serious deterioration, the change of their setting from suburban to a major commercial area.

Significance (Summary):

The buildings were constructed in 1932, contemporary with that of MD 210. The district lacks sufficient integrity (particularly of setting, materials, and association) to meet the criteria for the National Register.

Acreage: 21

8. Statement of Significance
=====

Applicable National Register Criteria (Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

- A Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B Property is associated with the lives of persons significant in our past.
- C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D Property has yielded, or is likely to yield information important in prehistory or history.

Criteria Considerations (Mark "X" in all the boxes that apply.)

- A owned by a religious institution or used for religious purposes.
- B removed from its original location.
- C a birthplace or a grave.
- D a cemetery.
- E a reconstructed building, object, or structure.
- F a commemorative property.
- G less than 50 years of age or achieved significance within the past 50 years.

=====
Located on a cul-de-sac across from the Livingston Square Shopping Center, Kaydot Circle includes ten modest frame structures situated on the same side of the street, facing a barren, grassy field. Ranging from vernacular Victorian-influenced one and two story structures to one story, plain side gabled cottages, the houses occupy a single 21 acre parcel developed circa 1932 and remain in residential use despite encroaching commercial development. Maryland National Capital Park and Planning Commission's historic preservation division believes that the structures may be Sears mail-order houses.

The southeastern section of Kaydot contains three houses that appear older than the remaining seven. This is due in large part to their more distinctive appearances, and their (relative) display of identifiable architectural details. House A is a broad rectangular mass with a front gabled roof, distinguished by a central entrance with a hipped roof, two over two windows, and decaying asbestos shingle siding. A corbel capped chimney protrudes from the ridgeline. House B is a simple "L" shaped structure consisting of a side gabled central section with a front gabled north end. An enclosed porch addition exists between the two roof sections. Sheathed in faux stone siding and aluminum, this house maintains its two over two windows and a corbel capped chimney similar to its neighbor. House C is a two story version of House B, presently clad in asbestos shingles. An assortment of windows include some two over two double hung sash, and the house is entered through a hip-roofed central porch. Like A and B, C has a corbel capped chimney and rafter ends are visible at the roof eaves.

The southwestern span of the circle contains three simpler houses (D, E, F). All are one and a half story rectangular blocks with side gabled roofs, with doors centered between one single and one double window. Two of the houses have simple shed roofs sheltering the entrance, the third features a full width front galley entered by steps on the side. Sheathed in asbestos siding approximating wood shingles, the gable ends feature vertical siding from the peak of the gable down to the line of the eaves. The houses have horizontally divided two over two windows and no chimneys.

The last stretch of the cul-de-sac contains four more structures. Houses G and H are identical to D, E, and F, with central entrances shaded by shed roof porches. House I appears to be the same form realigned with the gable end facing the street. On the side, an additional window exists in the position of the door. A single story front gabled enclosed entrance protrudes from the front elevation.

House G suggests a typical square bungalow form, with a broader front gable and a second story dormer facing the side. This house also features horizontal two over one windows and a corbel-capped chimney.

All of the houses display varying degrees of deterioration, ranging from deferred maintenance to serious neglect. The modest size of the houses has encouraged additions and alterations. While the original simple designs of the structures are discernible, their condition, replacement of historic materials, and the encroachment of commercial development in the immediate vicinity have compromised the integrity of the district.

=====
Between 1910 and 1930 Prince George's County population doubled to more than 60,000 as suburbanization continued. To accommodate such growth, the Indian Head Highway was constructed to move traffic more efficiently out to the Navy Proving Grounds and throughout the project area. This expansion paralleled the development of house packages sold by mail. The Aladdin Company, Sears and Roebuck, and Montgomery Ward began to feed the national dream of owning a small piece of America by offering modestly priced house packages suitable for construction on small lots.

The housing types sold reflected the range of popular styles during the period. The earliest house packages were available by 1900, and included stylistic holdovers from the 19th century, predominantly vernacular interpretations of Victorian cottages and two story dwellings. Later four-squares, bungalows, Cape Cod, and Colonial forms became popular. Sears, Roebuck and Company began offering houses in their 1908 catalogue. In the back of the catalog, Sears offered a standard grade of lower cost, pre-cut houses, typically a single story and less warm due to cheaper construction. By 1919 the company had its own architectural division, and emphasized the economy, quality of construction materials, and availability of credit to attract new customers. The company began opening showrooms in 1919, and by 1923 opened a Washington D.C. location at 704 10th street NW. According to studies, 243 Sears transactions took place in Prince George's County. Most of the conclusively identified Sears houses have been located in the northwest section of the county. An Americus model has been identified in Fort Washington, at 10706 Livingston Road, which is located just west of the study area.

Sears predominantly offered frame sheathed models with a brick veneer option. Asphalt shingles were also available as "oriental slate surface siding." Based on standard plans, the structures included in the Kaydot Circle could represent mail order houses and may have originated from Sears. According to all research, surviving examples of such houses commonly express individualization wrought by owners seeking more space or modern convenience. Studies have ascribed the significance of the houses to their

— numbers, as witness to the marked growth of the 20th century, especially with respect to suburbanization. The significance of altered dwellings has been questioned, given the large number of examples that survive today. The integrity of the structures included in this survey district compromises their significance substantially.
