Description of Property and Eligibility Determination *(Use continuation sheet if necessary and attach map and photo)*

Constructed circa 1939, this structure was built in response to intensified suburbanization of the study area following the construction of MD 210 and related to the expansion of federal offices and military installations in the county. This side gables, one and a half story house has symmetrical front dormers and six over one windows, and is clad in asbestos siding. It is exactly the same in form and primary features as its neighbor at 15842 Accokeek Road. Like this house, it maintains relatively good integrity overall, though the condition of this structure reflects general deterioration. It is typical of one ubiquitous house form popularized through mass construction in the middle twentieth century, and sometimes available for sale by mail order companies.

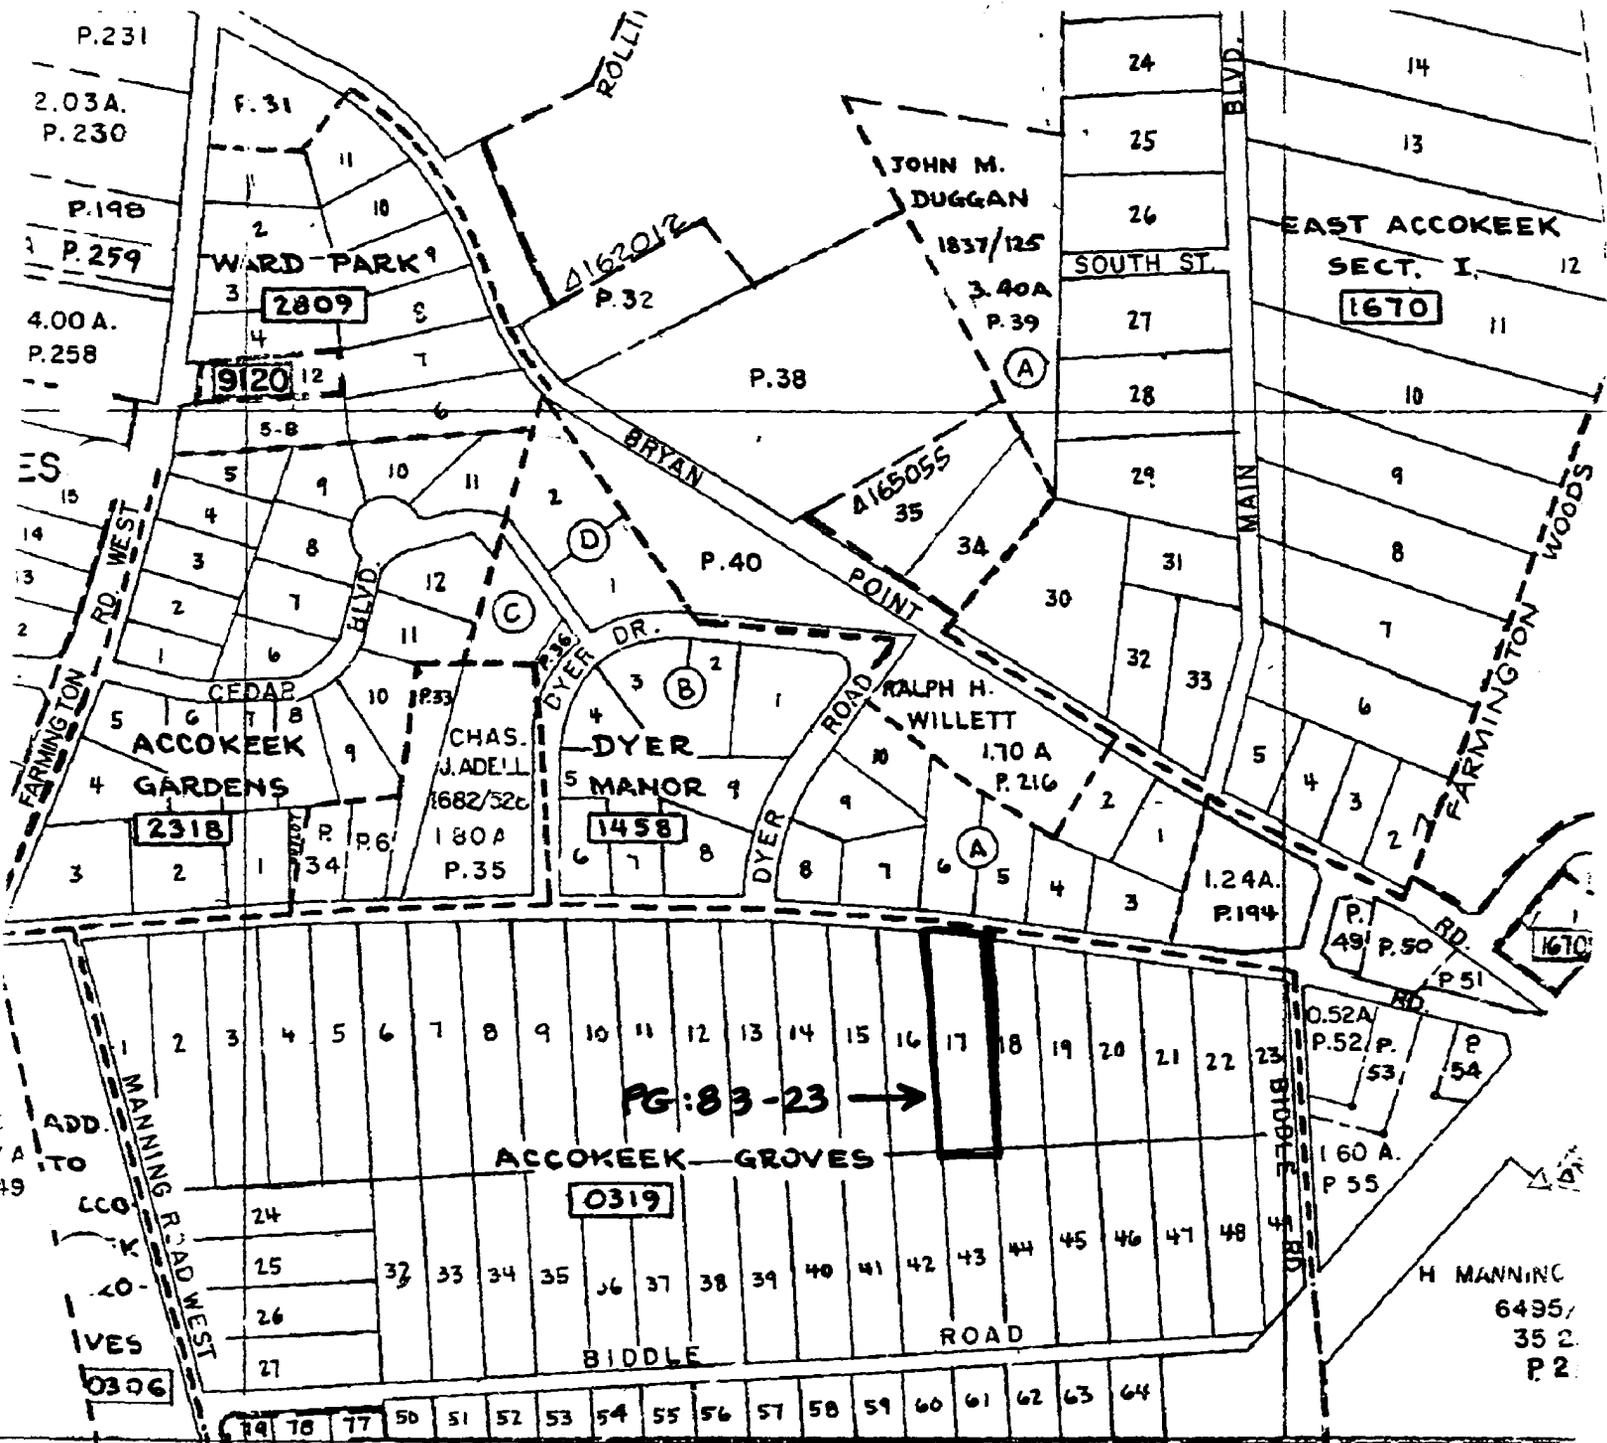

Research has not revealed any association between this structure and events that have made a significant contribution to the broad patterns of our history (Criterion A) or the lives of persons significant in the past (Criterion B). The building is not a good example of any style; nor is it distinguished; it does not represent the work of a master or display high artistic merit (Criterion C). Although archeology was not addressed in this study, there is no indication
