

P.G. #86A-24

1903/1920's

Croome Industrial and Agricultural Institute of P.G. Co.

St. Thomas Church Road, Croom, Md.

Pub/Unocc/Site/Unexposed

Nothing remains of the original buildings of the Croom Industrial and Agricultural Institute except for the decaying ruins of the "Hall" on the west side of the lane leading to St. Simon's cemetery. At the northeast corner of the same tract of land (on the south side of St. Thomas' Church Road) are a few small frame buildings, which are remnants of the Croome Settlement School (which succeeded the Institute in 1919).

After St. Simon's Chapel was established (ca. 1894) for the Black members of St. Thomas' congregation, Suzanne Willes, sister of the Rector, began to offer religious instruction, thus beginning her involvement with the education of Black youth. By 1899, she had begun to solicit funds to establish a school for "colored" boys and girls, and for this purpose, in 1902, she purchased 60 acres of land and had a large hall and other necessary school buildings constructed on it. The Croome Industrial and Agricultural Institute was incorporated in 1903, and had as its goal "industrial education as a means of opening---wider avenues of employment to young colored men and women." By 1918, the Institute was in serious financial difficulties, and dissolution was ordered. The land was reconveyed to Miss Willes, who formed a similar corporation disconnected from the church. This new school, chartered in 1919, was called the Croome Settlement School. Students came from various parts of southern Maryland; the principal courses were scientific agriculture and household skills. The school closed in 1952. Although very little remains of either phase of the school, the site is very important for it represents a unique effort in the Negro education movement. For the first half of the twentieth century, the Croome establishment offered practical instruction to young Blacks in an effort to provide them entry into the work force.

PRINCE GEORGE'S COUNTY  
HISTORIC SITE SUMMARY SHEET

Survey #: P.G. #86A-24 Building Date: ca. early 20th c.

Building Name: Croom Industrial and Agricultural School

Location: 14401 St. Thomas Church Road, Croom

Private/Residence/Occupied/Good/Inaccessible

Description

The Croom Industrial School is a two-story frame dwelling with a gable-front-and-wing plan, set on a tree-shaded knoll overlooking St. Thomas Church Road. The three bay north (main) gable end has entrance in the first bay through a door with a wide board surround. Windows are 2/2 double-hung-sash with wide board surrounds, flanked by green aluminum louvered shutters. The hipped roof entrance porch wraps around and continues on the west facade. The porch roof rests on square wood posts. The three bays of the west porch are enclosed to enlarge the interior north room. Two corbelled brick chimneys are set on the west roof slope. The structure is covered with aluminum siding and has an asphalt shingle roof. The poured cement foundation was added in 1925. The two bay north (rear) gable end has a second bay entrance into what was a class room. The east facade is complex, having two bays on the main block, and the projecting gable roof two-by-one bay east wing on the third bay. The building interior originally had an open plan, made up of two large classrooms and a kitchen and dining room. To the south (rear) and east of the house are several one story gable roof frame outbuildings built after 1925, used for classrooms and dormitories. An unpaved drive circles the house. Cedar trees line this drive. St. Simon's Church stood close to St. Thomas Church Road, west of the house.

Significance

The Croom Industrial School is significant for its vernacular architecture, and for its history as a school for negro children. St. Thomas Church rector Reverend Frank P. Willes' sister, Suzanne Willes, took up the cause of Negro education and in 1902 purchased 60 acres for a school. By 1903 a large hall and some smaller school buildings had been built. The Institute had financial difficulties by 1918, and dissolved and reformed as the Croome Settlement School. The small frame classroom buildings now on the site were constructed during the 1920's when the institution served as a home for District of Columbia Child Welfare Wards. It finally closed in 1952, and now serves as a residence for a family that had been connected with the settlement school. The dwelling on the school site served as classrooms and dormitories. Built before 1920, it is a plain vernacular dwelling, similar in plan to many late 19th and early 20th century dwellings in the County. The building has been further simplified in surface treatment by the addition of aluminum siding. It maintains its significance as the site of a unique effort in the Negro education movement.

Acreage: 1 acre

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Croom Industrial School is a two-story frame dwelling with a gable-front-and-wing plan. It is set on a tree-shaded knoll overlooking St. Thomas Church Road to its north.

The three bay north (main) gable end has entrance in the first bay through a door with a wide plain board surround, surmounted by a two-light transom. Windows are 2/2 double-hung-sash with wide board surrounds, flanked by green aluminum louvered shutters. The three bay hipped roof entrance porch, set on a poured cement base, wraps around and continues on the west facade. The porch roof rests on square wood posts set on high cement block bases. The porch cornice is deteriorated.

The first three bays of the five bay west facade are covered by the entrance porch. The porch was enclosed to enlarge the interior north room. The first two bays are set apart from the rear three. The last three bays are 6/6 sash windows rather than 2/2 sash. Two corbelled brick chimneys are set on the west roof slope.

The structure is covered with aluminum siding and has an asphalt shingle roof. The poured cement foundation was added in 1925, to enclose the crawl space beneath the building.

The two bay north (rear) gable end has a second bay entrance into what was a class room. The east facade is complex, having two bays on the main block, and the projecting gable roof two-by-one bay east wing on the third bay. A parged exterior chimney is centered on the east gable end of the wing. There is also a one story gable roof addition on the east gable end, with a bulkhead cellar entrance beneath it.

The building interior originally had an open plan, made up of two large classrooms and a kitchen and dining room. The north entrance entered directly into a classroom. A second classroom was directly behind it in what is now the kitchen and dining area. The school dining room and kitchen were in the east wing of the house. The upper floor was used for a dormatory.

To the south (rear) and east of the house are several one story gable roof frame outbuildings built after 1925, used by the school for classrooms and dormatories. There are three such buildings east of the house and two to the rear. An unpaved drive circles to the rear of the house and back out to the road. Cedar trees line this drive. Also to the south (rear) of the house is the site of what was the school auditorium. St. Simon's Church stood close to St. Thomas Church Road, west of the house.

Prepare both a summary paragraph of significance and a general statement of history and support.

The Croom Industrial School is significant for its vernacular architecture, and for its history as a training school for negro children. It also is closely connected with the history of St. Simon's, a black Episcopal Mission Chapel of St. Thomas Church, Croom.

St. Simon's Chapel was constructed in 1894 on the grounds of the St. Thomas Rectory, just north of St. Thomas Church, during the tenure of Reverend Frank P. Willes. Reverend Willis' two sisters, Suzanne and Katherine Willes, offered religious instruction at St. Simons. Suzanne Willes took up the cause of Negro education and by 1899 she began to solicit funds to establish an institute for the education of negro children. In 1902 she purchased 60 acres of land on the south side of St. Thomas Church Road to use for the establishment of a school. In the same year, St. Simon's received the services of a full-time black Episcopal priest, and the small wooden church building was moved to the 60 acre school tract. The building was placed close to and fronting on St. Thomas Church Road.

By 1903 a large hall and some smaller school buildings had been built and the Croom Industrial and Agricultural Institute of Prince George's County, Maryland was incorporated. It had as its chief object the "extension and improvement of industrial education as a means of opening better and wider avenues of employment to young colored men and women."

The Institute had financial difficulties by 1918, and the organization was dissolved and reformed as the Croome Settlement School. The Settlement School was to have no connection with the Episcopal Church. Suzanne Willes conveyed the now 45 acre property to the school's Board of Trustees, of which she was a member, in 1921. The small frame dormatory and classroom buildings now on the site were constructed during the 1920's. From the 1920's on, the institution served primarily as a home for District of Columbia Child Welfare Wards. In the 1940's it was again beset by finan-

STATE HISTORIC SITES INVENTORY FORM  
Statement of Significance (continued)

Survey No. PG-86A-24

Section 8 Page 2

---

cial difficulties, and finally closed in 1952. The St. Simon's congregation merged with St. Thomas Church in 1964 and the Chapel stood vacant until it was finally razed in 1974. In 1964 the 45 acres of the settlement school was sold to the Prince George's County Board of Education.<sup>1</sup> One acre of property, containing what was left of the school buildings was held by private owners. It now serves as a residence for a family that had been connected with the settlement school.<sup>2</sup>

The large dwelling that remains on the school site served as classrooms and dormitories. Built before 1920, it is a plain vernacular dwelling, similar in plan to many late 19th and early 20th century dwellings built in the County. It is a simplified version of the Victorian vernacular farm dwelling, similar in its large size, two story height, frame construction, gable-front and wing plan and wide entrance porch, but lacking embellishments such as turned and bracketed porch posts, or roof and gable decoration. The building has been further simplified in surface treatment by the addition of aluminum siding. It maintains its significance as the site of a unique effort in the Negro education movement.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

Nothing remains of the original buildings of the Croom Industrial and Agricultural Institute except for the decaying ruins of the "Hall" on the west side of the lane leading to St. Simon's cemetery. This building was constructed ca. 1902.

On the south side of St. Thomas' Church Road at the northeast corner of the same tract of land stand a few small frame buildings, which are remnants of the second institution, the Croom Settlement School (which succeeded the Croom Industrial and Agricultural Institute in 1919).

## #8 - SIGNIFICANCE (Continued)

School of Prince George's County, and its charter of 1919 stated that its purpose was the "industrial and educational betterment of the colored boys and girls of Southern Maryland, said work to be on absolutely a non-sectarian foundation but broadly religious, the aim of the school being the Christian character of every pupil . . . ." In 1921 Susie Willes conveyed the 45 acre property to the Croom Settlement School. Several new frame school buildings were constructed during the 1920's which still stand today. Again, scientific agriculture and household skills were the principal courses offered by the school. Students came from various parts of Southern Maryland; the school also served for many years as a home for District of Columbia Child Welfare wards. The Croome Settlement School closed finally in 1952, and the ca. 45 acre property was sold in 1964 to the Prince George's County Board of Education.

Although very little physical evidence remains of the two phases of this school, its site is very important for it represents a unique effort in the Negro education movement. For the first half of the twentieth century, up to the eve of school desegregation, the Croome establishment offered practical instructions to young black people, at first under the wing of the Episcopal Church, and later as a non-sectarian venture, in an effort to provide them entry into the work force.
