city, town Brandywine state and zip code MD 20613

5. Location of Legal Description

courthouse, registry of deeds, etc. Prince George's County Courthouse liber 2511

street & number Main Street folio 646

city, town Upper Marlboro state MD

6. Representation in Existing Historical Surveys

title Prince George's County Inventory of Historic Sites

date 1974 federal state county local

depository for survey records History Division MNCPPC

city, town Riverdale state MD

7. Description

Survey No. PG#87A-13

Condition		Check one	Check one
<input type="checkbox"/> excellent	<input type="checkbox"/> deteriorated	<input type="checkbox"/> unaltered	<input type="checkbox"/> original site
<input type="checkbox"/> good	<input type="checkbox"/> ruins	<input type="checkbox"/> altered	<input type="checkbox"/> moved date of move _____
<input type="checkbox"/> fair	<input checked="" type="checkbox"/> unexposed		

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

These were two early nineteenth century barns, probably part of the George E. Orme farm in the late nineteenth century. One was sided with horizontal board, the other with vertical board. Both were constructed of elements joined by mortise and tenon.

8. Significance

Level of Significance: national state local

Prepare both a summary paragraph of significance and a general statement of history and support.

These barns were probably part of the George E. Orme farmstead. Both barns have been destroyed within the last decade.

DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE	
<p><u>BARN #1</u></p> <p>The barn is a frame structure with mortise, tenon, and pegged framing covered with horizontal sheathing. The rafters are mortised, tenoned, and pegged at the ridge and rest on a toe board, supported on the ends of the tie beams. There are four collars half-lapped over each set of rafters. The wall studding consists of principal posts with rails mortised into them. The secondary studding is mortised into plate and sill but not jointed or nailed to the rails. The tie beams are notched and rest on the plate. The posts south of the doorway have large braces that are mortised, tenoned and pegged to the tie beam corresponding to the wall posts. This is the only truss other than the end walls; the other rafters are set randomly in relation to the posts. At the corners, the end plates are mortised into the front and rear plates and the posts are mortised into the front and rear plates.</p> <p><u>BARN # 2</u></p> <p>The framing of this barn is similar to that of the first. It is taller and sheathed with vertical siding. There are no studs, the walls supported by principal posts alone with rails mortised into them. The central post is treated as a truss, but instead of rising upward from the wall post, the angle brace rises to the wall post, the lower end being mortised into a girt or joist spanning the barn. The front and rear plates are scarfed, one being original. Much of the framing has been repaired or replaced with nailed members.</p>
