 DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Higman Mill ruin is located on the east bank of Unicorn Branch northwest of the intersection of Hackett Corners Road and Higman Mill Road.

All that remains of the mill is a stone foundation built into the east bank of the stream. The foundation is approximately 32 feet square and is constructed of rubble coursed granite. The walls are 16 to 18 inches thick and in some places rise 10 to 15 feet in height. The door and window openings are framed in brick. The mill race is still visible for some distance to the south (upstream) of the mill. A short tail race also survives. The 1877 Atlas map indicates that the dam and mill pond was located approximately one-half mile upstream.

The present owner recalls that a photograph of the building was published in the newspaper years ago. The upper structure was frame.
