# National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations of eligibility for individual properties or districts. See instructions in *Guidelines for Completing National Register Forms* (National Register Bulletin 16). Complete each item by marking "x" in the appropriate box or by entering the requested information. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, styles, materials, and areas of significance, enter only the categories and subcategories listed in the instructions. For additional space use continuation sheets (Form 10-900a). Type all entries.

DESCRIPTION SUMMARY:

St. Peter's Methodist Episcopal Church is a large single-story Gothic frame church with four-story bell tower on the southern corner. Spreading to the southwest, northwest and northeast sides is a cemetery with nineteenth and twentieth century markers. Built in 1850 and extensively reworked in 1901, the church is sheathed with a combination of narrow weatherboards and fishscale shingles. The upper gable and top fourth of the tower are sheathed with a combination of round-butt and pointed shingles. The steeply pitched asphalt shingle roof has extended eaves and exposed rafter feet. The northwest or rear elevation has a centrally located shed-roofed apse. The church interior dates from the extensive 1901 remodeling. The sanctuary ceiling has narrow beaded boards with a cove cornice around the sides. The altar is separated from the main body of the sanctuary by a turned post balustrade.

Section number 7 Page 1GENERAL DESCRIPTION:

St. Peter's Methodist Episcopal Church stands on the southwest corner of the intersection of the Old Crisfield-Marion Road and Heart's Ease Road near Hopewell, Somerset County, Maryland. The large single-story Gothic Revival frame church faces southeast with the principal gable oriented on a northwest/southeast axis. A four-story bell tower rises on the southern corner. Spreading to the southwest, northwest and northeast sides is the church cemetery with markers dating from the nineteenth and twentieth centuries.

The gable-front frame church, first built in 1850 and extensively reworked in 1901, is supported by a minimal brick pier foundation and is sheathed with a combination of narrow weatherboards and fishscale shingles. The upper gable and top fourth of the tower are sheathed with a combination of round-butt and pointed shingles. The steeply pitched asphalt shingle roof has extended eaves and exposed rafter feet.

The southeast (main) facade of the church is distinguished by a single Gothic-arched window opening which consists of a pair of pointed arch windows. A round, colored glass window pierces the upper gable at the transition between weatherboards and patterned wood shingles.

The southeast tower elevation consists of a large Gothic-arched double-door opening with a diamond-pane transom. A small diamond-paned, diamond-shaped window marks the second level, while a small round window distinguishes the third level. The pyramidal roofed belfry is framed by four shingled columns with arched openings between each column. Patterned wood shingles cover the pyramidal tower, which is topped by a turned wood finial.

The northeast and southwest sides are essentially alike with each wall marked by three diamond-pane lancet windows.

The northwest or rear elevation has a centrally located shed-roofed apse. Each side of the apse has a narrow lancet window, while the apse itself is flanked by lancet windows.

S-289

Section number 7 Page 2

---

The church interior dates from the extensive 1901 remodeling of the 1850-1852 structure. Along with the addition of the front entrance tower, the sanctuary ceiling was reworked with narrow beaded boards with a cove cornice around the sides. The small area around each chandelier is highlighted by molded trim in the shape of a diamond. The angled Victorian pews are traditionally divided by a center aisle. The altar is separated from the main body of the sanctuary by a turned post balustrade. Access into the roof structure is provided by a long ladder in the tower. Inside the roof structure of the church it is clearly apparent that the frame of the 1850-1852 church was reused. Ell-shaped corner posts survive and structural evidence suggests the mid nineteenth-century Greek Revival church had a gable-front pediment. The majority of the roof structure was completely reworked during the 1901 renovation.

State significance of property, and justify criteria, criteria considerations, and areas and periods of significance noted above.

SIGNIFICANCE SUMMARY:

St. Peter's Methodist Episcopal Church is important for the architectural character of its present appearance which is the result of a 1901 remodeling. The building has the distinctive characteristics of the Gothic style rural church built in Somerset County in some numbers in the closing decades of the nineteenth century and continued to a lesser amount in the early decades of the twentieth. Typically, these buildings have a central rectangular block with a sharply pitched roof and large Gothic arched windows. Added to this generally are a bell tower and pavilions with a resultant complex Tee or cross plan. These churches are prominent usual landmarks on the flat terrain of Somerset County. St. Peter's represents a restrained version of this Gothic church on the exterior. The interior, however, is elaborately decorated with beaded boards and turned balusters. Distinctive is the angling of the pews which is more unusual than usual for this type of church in the county. Rock Creek Methodist Episcopal Church near Deal Island has a sweeping curve arrangement of pews but is a larger structure. Unlike the other Gothic churches but a reflection of its turn of the century date is the Romanesque treatment to the cap of the bell tower. The cap is characterized by shingle siding, round arches, and a pyramidal roof.

HISTORIC CONTEXT:

St. Peter's Church, first organized as Miles Meeting House, has served members of the Methodist faith living in southern Somerset County since its formation in 1782. As the earliest Methodist congregation located in the lower half of Somerset County, St. Peter's Church holds a key position in the formative history of Methodism on the lower Eastern Shore.

The organization of a Methodist congregation near Jones Creek in southern Somerset County dates to 1782. First known as Miles Meeting House, the initial church structure is reported to have been built around 1784. In 1813, the congregation was renamed St. Peter's. By 1817 a second church building had been erected which lasted until the mid nineteenth-century. Between 1850 and 1852 a third edifice was raised that evidently followed the currently popular Greek Revival style with a gable-front orientation and a classical pediment. Trustees' minutes document that a church spire was erected in 1884, and at the same time, the Ladies Aid purchased a bell for \$1,000 from the McShane Foundry in Baltimore. In 1901, the congregation financed the rebuilding of the Greek Revival church. A Baltimore architect only remembered as Professor Abdul was retained for redesigning the exterior and interior. It was at this time that the roof was rebuilt, the entrance was relocated to the tower, and Gothic Revival windows were substituted for the old sash windows. The interior was reworked as well with the removal of the slave gallery and the application of the beaded board wainscoting and ceiling. Since the turn of the century the church has not received any significant alterations.

VERBAL BOUNDARY DESCRIPTION:

All that lot or parcel of land situate in Lawson's Election District, Somerset County, Maryland, beginning at the intersection of the old Crisfield-Marion Road and Heart's Ease Road which forms the northeast corner of the church lot, thence in a northwesterly direction for a distance of 300 feet along the south side of Heart's Ease Road to a point, thence in a southwesterly direction across an open field for approximately 637.5 feet to a point, thence in a southeasterly direction for approximately 112 feet to a point on the north side of the old Crisfield-Marion Road, thence in a northeasterly direction along the north side of the aforesaid Road for approximately 637 feet to the place of beginning, containing 2 acres more or less.

BOUNDARY JUSTIFICATION:

The property consists only of the rural lot upon which it stands and has stood historically.

S-289  
 St. Peter's M.E. Church  
 Hopewell vicinity  
 public worship

Founded 1782, 1817,  
 Rebuilt 1850, 1901

First known as Miles Meeting House, this <sup>METHODIST</sup> Episcopal congregation dates to 1782 with first construction of a church two years later. In 1813 the congregation was renamed St. Peter's, and four years following, a second church was finished. The second structure evidently lasted until 1850-1852, when the third edifice was raised. Thirty years later a new spire was erected, and a \$1,000 McShane Bell from McShane Foundry in Baltimore was purchased by the Ladies Aid. Finally in 1901, a Baltimore architect was hired to rework the 1850 building in a Gothic Revival style. The rebuilding of the church included replacing the roof structure and relocating the front door in the tower. Aside from a rebuilding of the tower spire damaged due to lightning, the church has not been altered significantly since the turn of the century. The interior largely dates from the Victorian remodeling with angled pews and a beaded board ceiling with a coved perimeter.

St. Peter's Methodist Episcopal Church is one of the best preserved rural Victorian church buildings in Somerset County. Unlike other contemporary examples, St. Peter's has not been compromised with artificial siding or disfigured with additions. The simply executed surface decoration, with layers of horizontal weatherboards and fishscale shingles, distinguishes the main body of the church as well as the pyramidal roofed tower. Also significant is the fact that the 1901 remodeling of the building reused the c. 1850-1852 mortise and tenon frame of the former church. A Baltimore architect, remembered as Mr. Abdule, reworked the mid nineteenth-century frame by replacing

the roof and removing all interior elements including the slave gallery. A cemetery that reflects the span of church ownership from the 1780s until the present day is located north and south of the building.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

St. Peter's Methodist Church stands on the southwest corner of the intersection of the Old Crisfield-Marion Road and Heart's Ease Road near Hopewell, Somerset County, Maryland. The large single-story Victorian frame church faces southeast with the principal gable running on a northwest/southeast axis. A four-story bell tower rises on the southern corner.

The ~~main~~ gable-front structure is supported by a minimal brick pier foundation and is sheathed with a combination of narrow weatherboards and fishscale shingles. The upper gable and top fourth of the tower are sheathed with a combination of round-butt and pointed shingles. The steeply pitched asphalt-shingle roof has extended eaves and exposed rafter feet.

The south (main) facade of the church is distinguished by a single Gothic-arched window opening which consists of a pair of pointed arched windows. A small colored glass window pierces the upper gable at the transition between weatherboards and wood shingles.

The front tower elevation consists of a large Gothic-arched double-door opening with diamond pane transom. A small diamond-paned diamond-shaped window marks the second level, while a small round window distinguishes the third level. The pyramidal roofed bellfry is framed by four shingled columns with arched openings between each column. Wood shingles cover the pyramidal tower, which is topped by a turned wood finial.

The northeast and southwest sides are essentially alike with each wall marked by three diamond-pane lancet windows.

The northwest or rear elevation has a centrally located shed-roofed apse. Each side of the apse has a narrow lancet window, while the apse itself is flanked by lancet windows.

The church interior dates from an extensive 1901 remodeling of the 1850-1852 structure. Along with the addition of the front entrance tower, the sanctuary ceiling was redone with narrow beaded boards with a cove around the sides. The small area around each chandelier is highlighted by molded trim in the shape of a diamond. The angled Victorian pews are traditionally divided by a center aisle. The altar is divided from the main body of the sanctuary by a turned post balustrade. Access into the roof structure is provided by a long ladder in the tower. Once inside the room above the entrance, it is clear that the c. 1850-1852 frame church had ell-shaped corner posts and probably a gable-front pediment. The roof structure was completely rebuilt during the c. 1900 renovation.

Prepare both a summary paragraph of significance and a general statement of history and support.

St. Peter's Methodist Episcopal Church is one of the best preserved rural Victorian Church buildings in Somerset County. Unlike the others, St. Peter's has not been compromised with artificial siding or disfigured with additions. The simply executed surface decoration with layers of horizontal weatherboards and fishscale shingles distinguishes the main body of the church as well as the pyramidal roofed tower. Also significant is the fact that the 1901 remodeling of the building reused the c. 1850-1852 mortise and tenon frame of the former church. A Baltimore architect, remembered as Mr. Abdul, reworked the mid 19th-century frame by replacing the roof and removing all interior elements including the slave gallery. A cemetery which reflects the span of church ownership from the 1780s until the present day is located north and south of the building.

History and Support

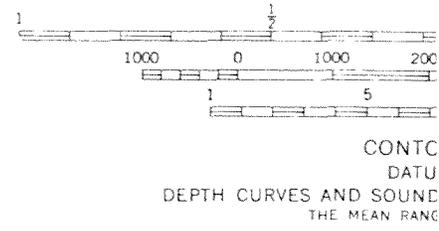

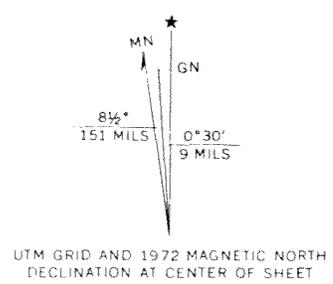

First known as Miles Meeting House, this congregation dates to 1782 with first construction of a church two years later. In 1813 the congregation was renamed St. Peter's, and four years following, a second church was finished. The second structure evidently lasted until 1850-1852 when the third edifice was raised. Thirty years later a new spire was erected, and a \$1,000. McShane Bell from McShane Foundry in Baltimore was purchased by the Ladies Aid. Finally in 1901 the Baltimore architect was hired to rework the 1850 building in a Gothic Revival design which included replacing the roof structure and relocating the front door in the tower. Aside from a rebuilding of the tower spire due to damage from lightening, the church has not been changed appreciably *SINCE THE TURN OF THE CENTURY.*
