

Homayouni House
SM-671
23264 Three Notch Road (MD 235)
California vicinity
Circa 1948
Private

The Homayouni House was most likely built *circa* 1948 following the establishment of the Patuxent Naval Air Station (NAS) earlier in the decade. Prior to the formation of NAS, the county's economy was primarily based upon agriculture (tobacco) and fishing, and very little modern development was evident in this portion of the state. In 1940, the population of the Bay district was 1,287; by 1950 it had increased nearly five-fold to 10,575. With this tremendous influx of workers in so short a period, residences were constructed near the base, and later spread to outlying areas along Three Notch Road (MD 235); intense modern commercial development has occurred within the past decade, further transforming the landscape.

This one-story gable-roof frame house is a common example of the type of dwelling that was constructed during the mid-twentieth century. Houses built during this time typically consisted of 1 or 1.5-story frame or brick dwellings in Cape Cod, bungalow and ranch styles. They commonly had gable roofs (both front and side facing), multi-pane double-hung sash and tripartite picture windows, and minimal decorative details such as brick window sills, shutters and sometimes simple moldings or pilasters at the main entry. Variations on the basic type included concrete block construction (sometimes stucco covered) and a hipped roof. These house types, which feature similar massing, shape and materials, were built in large numbers following World War II.

7. Description

Inventory No. SM-671

Condition

excellent deteriorated
 good ruins
 fair altered

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

The residence at 23264 Three Notch Road (MD 235) is located approximately 75 feet east of the road, at the southeast corner of MD 235 and By the Mill Road. Several mature trees and shrubs surround the house. A gable-roof frame shed, a gable-roof concrete block shed, and a brick-covered well stand southeast of the dwelling.

The 1-story frame building clad in wood clapboard siding is supported by a concrete block foundation. The house has an asphalt shingle gable roof with a cross-gable entry in the west elevation. A one-story flat-roof addition extends from the east side of the dwelling. A center brick chimney rises through east slope of the roof. Windows throughout the house consist of six-over-six and four-over-four double-hung sash. A white brick wainscot has been applied to the north, west and south elevations of the building.

A gable-roof central entry with fluted pilasters and brick stoop is located in the west, or main, elevation. A tripartite picture window with a center fixed light flanked by four-over-four double-hung sash is located north of the entry; a single six-over-six double-hung sash is located south of the entry. The south elevation of the main block contains three six-over-six double-hung sash in the first story, and a small window is located in the gable. The east elevation of the main block contains a single six-over-six double-hung sash window on either side of the flat-roof addition. The north elevation of the main block contains two pairs of six-over-six double-hung sash in the first story; a hipped-roof bay contains the northeastern set of windows. A small window is located in the gable.

Evaluation for:

National Register Maryland Register not evaluated

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance reports, complete evaluation on a DOE Form - see manual).

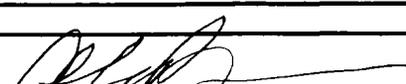

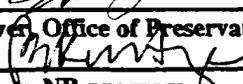

The Homayouni House was most likely built *circa* 1948 following the establishment of the Patuxent Naval Air Station (NAS) earlier in the decade. Prior to the formation of NAS, the county's economy was primarily based upon agriculture (tobacco) and fishing, and very little modern development was evident in this portion of the state. In 1940, the population of the Bay district was 1,287; by 1950 it had increased nearly five-fold to 10,575 (Hammett 1991:491). With this tremendous influx of workers in so short a period, residences were constructed near the base, and later spread to outlying areas along Three Notch Road (MD 235).

Houses built during this time typically consisted of 1 or 1.5-story frame or brick dwellings in Cape Cod, bungalow and ranch styles. They commonly had gable roofs (both front and side facing), multi-pane double-hung sash and tripartite picture windows, and minimal decorative details such as brick window sills, shutters and sometimes simple moldings or pilasters at the main entry. Variations on the basic type included concrete block construction (sometimes stucco covered) and a hipped roof. These house types, which feature similar massing, shape and materials, were built in large numbers following World War II.

It is unlikely that historic or prehistoric archeological resources are preserved on this property. The extensive disturbance typically associated with construction during the last 50 years is likely to have displaced any archeological resources that may have been on this property. Similarly, commercial and residential development in the vicinity make the survival of archeological resources on adjacent properties unlikely.

Historical documentation does not indicate that this resource is associated with Criterion A, broad patterns of history or a significant event or Criterion B, an important person who contributed to local or state history. The property does not embody distinctive characteristics of a type, period, or method of construction nor does it represent the work of a master or possess high artistic value; therefore, Criterion C, architecture, does not apply. Lastly, the property is unlikely to yield information which contributes to our understanding of human history. As a result of recent modern development in the immediate area, the property lacks integrity of association, feeling and setting. Despite minor alterations, the dwelling appears to retain integrity of design, materials, workmanship and location.
