### **Architectural Survey File**

This is the architectural survey file for this MIHP record. The survey file is organized reverse-chronological (that is, with the latest material on top). It contains all MIHP inventory forms, National Register nomination forms, determinations of eligibility (DOE) forms, and accompanying documentation such as photographs and maps.

Users should be aware that additional undigitized material about this property may be found in on-site architectural reports, copies of HABS/HAER or other documentation, drawings, and the “vertical files” at the MHT Library in Crownsville. The vertical files may include newspaper clippings, field notes, draft versions of forms and architectural reports, photographs, maps, and drawings. Researchers who need a thorough understanding of this property should plan to visit the MHT Library as part of their research project; look at the MHT web site ([mht.maryland.gov](http://mht.maryland.gov)) for details about how to make an appointment.

All material is property of the Maryland Historical Trust.

SOUTHAMPTON  
Chaptico  
Private

mid-18th century

One of the most unique features of this 1 1/2-story gambrel-roofed frame house was the exposure of the back wall of the chimney stacks on the clapboard ends. As at Deep Falls (1745), the chimney base formed a solid wall at the ground-floor level and had three separate pent closets with arched windows between the fireplace openings.

TYPES  
OF  
ST. MARY'S  
CHIMNEYS

• SOUTHAMPTON •  
*built by Richard Booth in the 17<sup>th</sup> Century*

This view is of NEALE'S HILL with pent to one side of the chimney. James Neale, Lord of Wolleston Manor, was the founder of the Neale family in Maryland in 1642. He was Head of his Lordship's Treasury, and a Deputy-Governor.

Another dwelling with pent to one side of the chimney is "Windsor Forest", old home of Col. Heard in St. Mary's County.
