

East Bonfield
Oxford vicinity
1852

T-377

East Bonfield is a telescope house built for James H. Willis in 1852, consisting of a 2½ story 5-bay frame section, a smaller 2½ story frame wing, and a new 1-story kitchen wing. The interior has an early Victorian staircase and original floors, doors, trim, and mantels. East Bonfield still belongs to descendants of its builder.
