Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The William Hunt house is located on the north side of Talbot Street in Claiborne, Talbot County, Maryland. The T-shaped house faces south with the principle gable oriented on an east/west axis.

Built around 1900, this two-and-a-half story structure is sheathed in yellow, wood grain, vinyl siding and roofed with asphalt shingles. The foundation consists of brick piers painted green. The roof line is finished with a box cornice.

The south (main) elevation has a two-and-a-half story, three-sided gable end structure as the western most bay. This bay is lit on the first and second storys by three two-over-two sash windows with wide surrounds and brown, louvered shutters. Decorative spindle work finishes the corners of this gable end which has cornice returns. One two-over-two sash window lights the attic story. An open porch with turned supports stretches across the first floor of the house's main body. This first floor is pierced with a four panel entrance door with a two-light transom and one two-over-two sash window with wide, white surrounds and brown, louvered shutters. The second floor is lit by two two-over-two sash windows with wide, white surrounds and brown, louvered shutters. An interior brick chimney rises from the center of the house.

The east elevation is lit on the first and second floor by one two-over-two sash window with wide, white surrounds and brown, louvered shutters. This gable end is finished with cornice returns and is lit by one two-over-two sash window with wide, white surrounds at the attic level. A one-story, shed roof addition lit by two six-light casement windows extends to the north of the house.

The north elevation has a one-story, shed roof addition across the first floor to the projecting, western most, gable end bay. When first built this addition was simply an open porch. By the late 1930s this addition was enclosed and lit by five six-light casement windows. The second floor is lit by two two-over-two sash windows with wide, white surrounds and brown, louvered shutters. The western bay is lit by one two-over-two sash window with wide, white surrounds and brown, louvered shutters on the first and second floor. This gable end is finished with cornice returns and lit at the attic level by one two-over-two sash window with wide, white surrounds.

 Level of Significance: national state local

Prepare both a summary paragraph of significance and a general statement of history and support.

William T. and Sarah C. Hunt, formerly Sarah Spence, purchased this property from John Cockey in 1898. By 1902 it appears on the USGS map of Maryland. In 1913 the Hunts sold this property to Henry B. and Olia A. Richards. "Harry" Richards was a ferry ticket agent who had begun his career working as the B.C.&A. stationmaster at McDaniel. The Richards lived here until 1968 when the property was sold to T. Otis Jones, who sold it to Thomas Coleman DuPont in 1976. The DuPonts sold the house to its current owner.

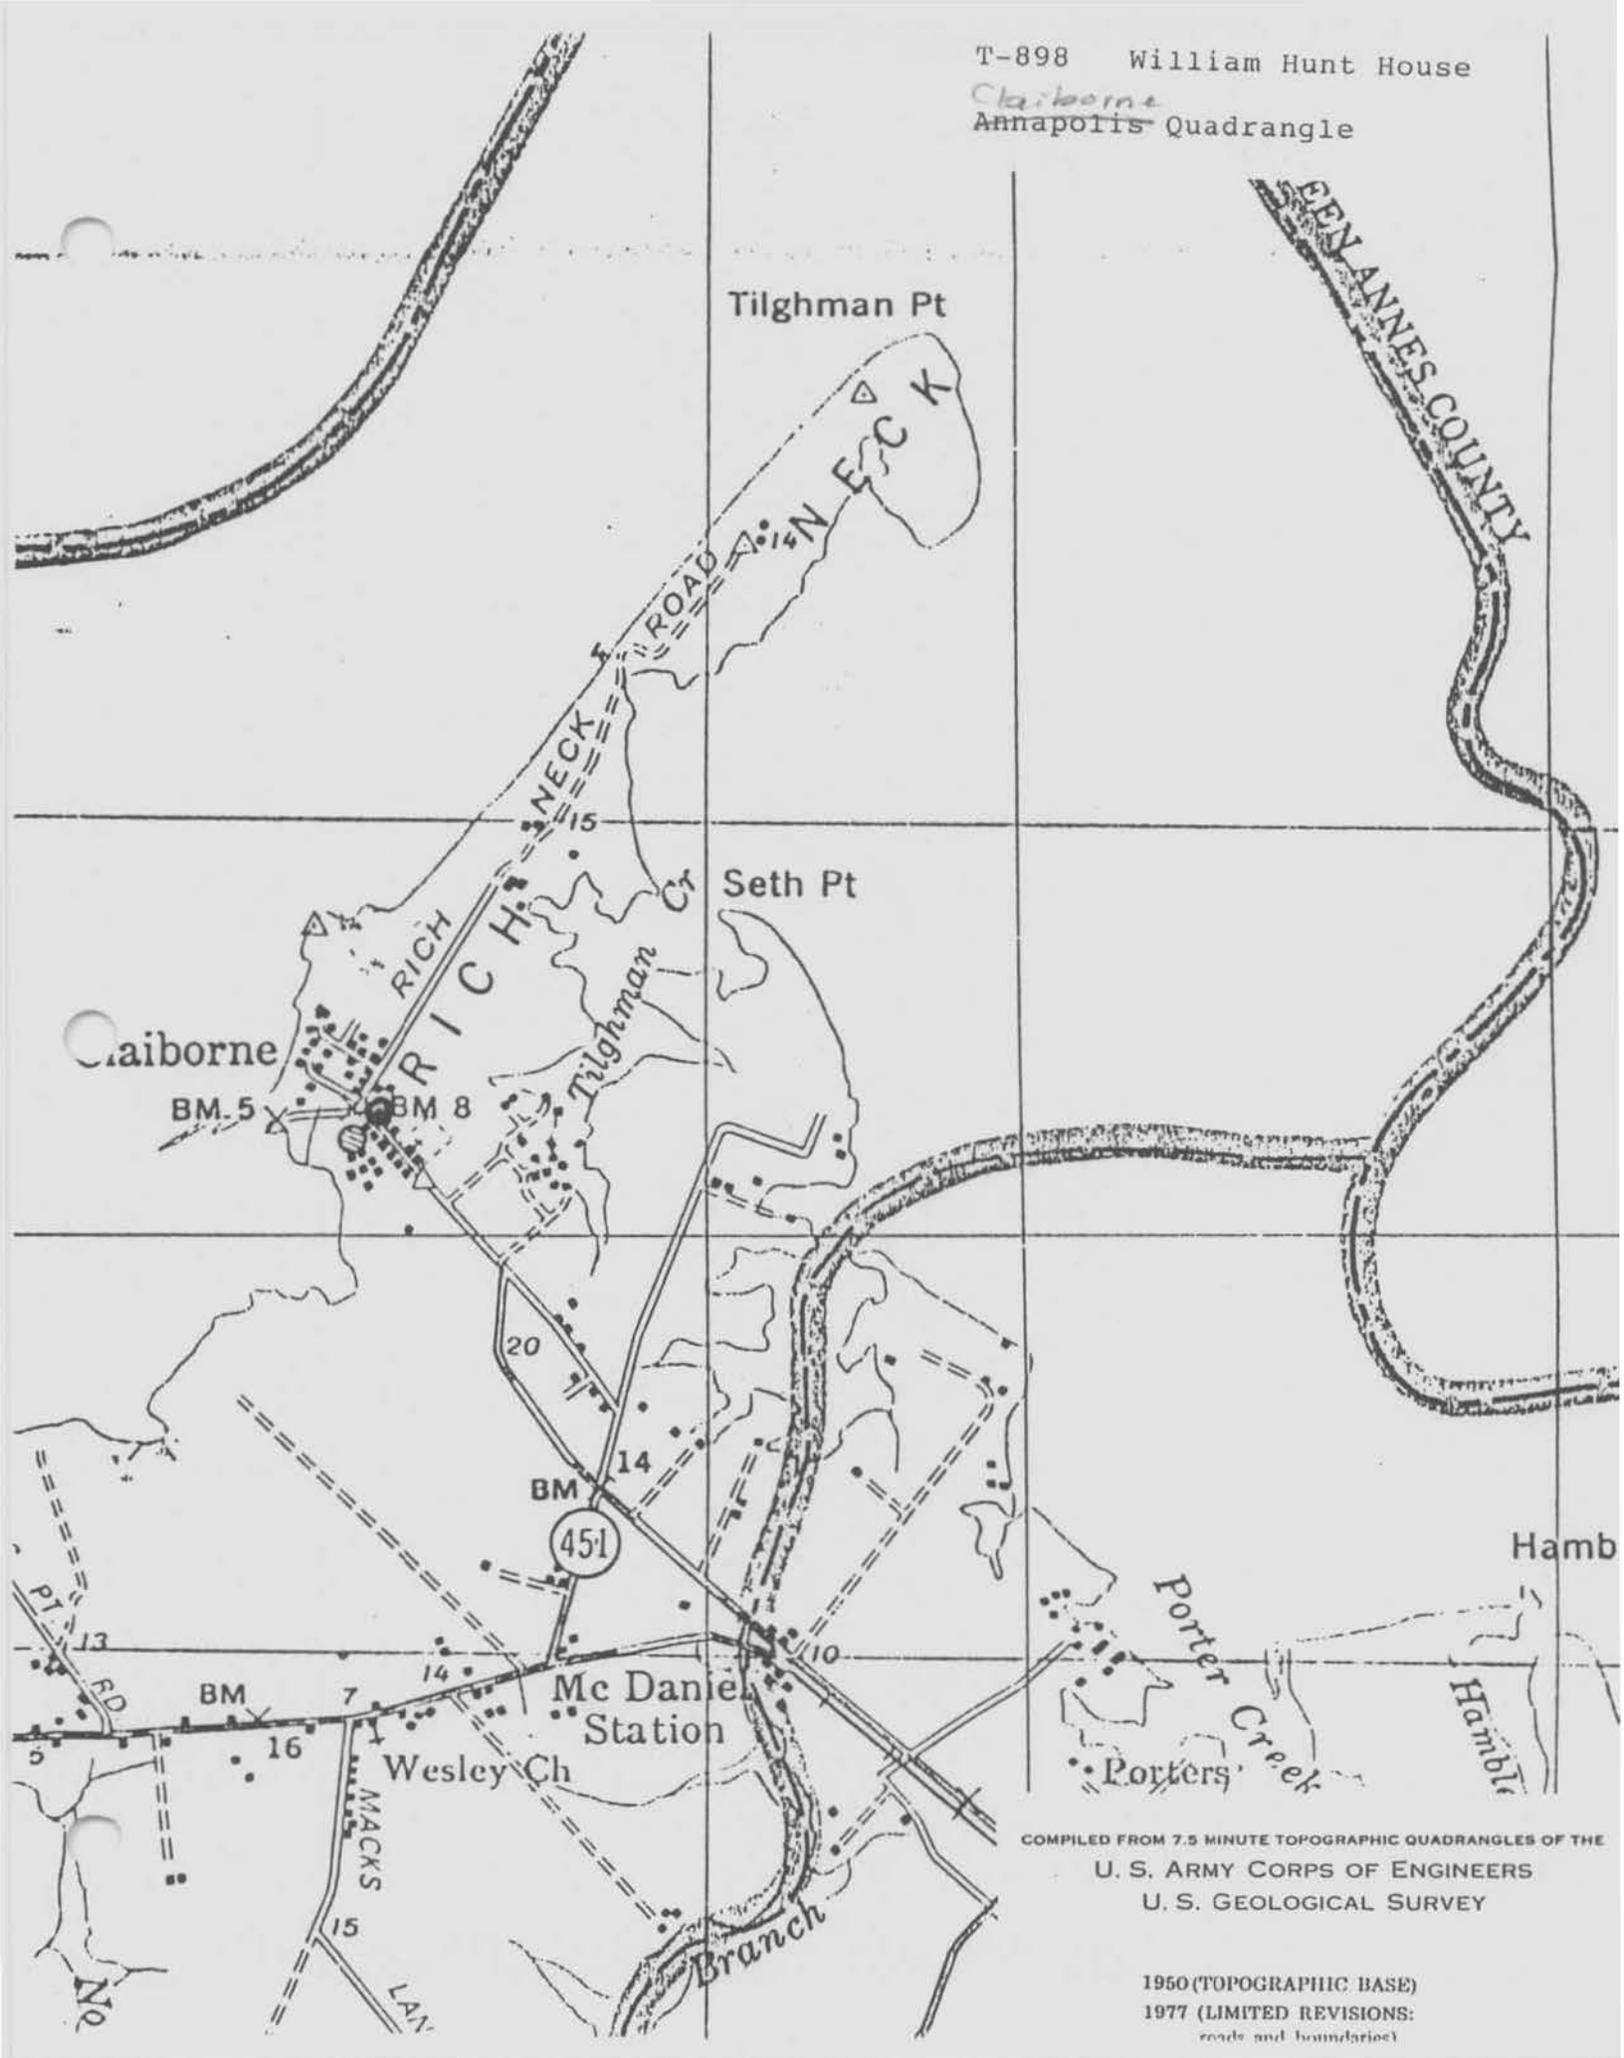

Except for the vinyl siding, this house has changed little over the years. The open porch and shallow setback from the main street are typical of the neighborly Claiborne community.

T-898

William Hunt house Description cont'd.

The west elevation is lit by two two-over-two sash windows with wide, white surrounds and brown, louvered shutters on the first and second floors. An interior, brick chimney pierces the roof of this wing.

There are two outbuildings on the property. One is sheathed in white weatherboard and the gable roof is covered with asphalt shingles. It is lit by two four-light windows and has a red batten door. The second outbuilding is sheathed in white, vertical wood siding and the gable roof is covered with green tin. The two large swing doors on this structure suggests that it served as a garage at one time.
