DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

This house is located about 1/4 mile south of Beard's Church Road, approximately 1/2 mile east of Beck Road. It is situated near a small stream with its facade facing east.

The structure is a three-bay, two-story brick dwelling with an el of log and brick extending to the rear. It is painted yellow with light green trim. The log portion of the house which includes the westernmost three bays of the el, is covered with wooden siding. The walls of the brick sections are laid in common bond. The house is set on low stone foundations. A vertical seam is present in the brick work at the point where the el joins the front section of the building, providing evidence of two periods of building in brick.

Windows of the facade are spaced regularly in the wall. They contain six-over-six light sashes, set in a plain architrave. Facade windows are flanked by louvered shutters. Other windows contain two-over-two pane sashes with Victorian period trim.

The main entrance is located in the south end bay of the facade. It is quite plain with a narrow transom above the door. Other doors are located in the el, and are trimmed with a minimum of decorative woodwork.

Decorative work is present at the cornice of the facade which consists of large projecting blocks. The roof of corrugated sheet metal extends beyond the house wall several inches at the gables. An inside end chimney of bricks is located at the north gable of the facade. A second chimney is located inside the west gable end of the el. A small belfrey is present along the center of the roof ridge at the juncture of the log and brick sections. A three-bay entrance porch with a hipped roof and Victorian trim extends along the facade. The south door of the log section is protected by a shed roof porch. Porches are also present on the north side of the el.

The house is in good condition and is not at present in danger of destruction.

Several other old buildings which could predate the main house are located nearby. A small 1-1/2 story stone cabin, two bays in width is situated just west of the house. Its original use has not been determined, although it could have served as a dwelling. Adjacent to the main house stands a one-story, two-bay log structure which has been covered with siding. Plain Victorian trim faces the door and windows. A large fireplace is located at the north gable end of the building. The interior is divided into two rooms. Just north of the main building is a small board and batten structure set on high stone foundations. It houses a bake oven which is in good condition. A cemetery plot is located east of the right angle turn in the private road leading from Beard's Church Road to the buildings. The property contains 96.33 acres.

STATEMENT OF SIGNIFICANCE

The area of significance of this building is its architecture. The main house and the surrounding old buildings represent various aspects of Washington County's architectural and social history.

The log building tradition was very strong in Washington County, with structures dating from the first half of the 18th century to late in the 19th century. Stone was also a popular building material for Washington County's early vernacular building with brick being used for slightly more formal buildings.

The merit of this complex of buildings lies in the presence of a variety of types of structures reflecting the County's early building needs.

The property is part of a grant of land called "Scared from Home" for 1,373 acres, patented to Nicholas Baird, February 7, 1760.¹
