

ABSTRACT

WA-I-226

1877

Eshleman-Hege Farm
Hagerstown Vicinity
private

This farm complex consisting of a brick house dated 1877 and a frame barn and outbuildings is one of several in the immediate vicinity which was built by the Eshleman family. This group provides an example of late 19th century farm architecture in Washington County. Elements of this house such as its two front doors reflect Pennsylvania German building traditions. The house is believed to have been built by Jacob W. Eshleman whose grandfather Peter Eshleman came to this area from Lancaster County, Pennsylvania in 1831 and bought several hundred acres of land in the vicinity of Reid.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This farm complex is located north of Reid Road west of its junction with Paradise Church Road in Washington County, Maryland. The house is situated on sloping ground and faces east.

The dwelling is a two story brick structure resting on coursed limestone foundations which become nearly a story in height at the south and east elevations. The bricks forming the walls are arranged in American or common bond with, generally, six courses of stretcher bricks between header rows. Located in the north gable are glazed header bricks arranged to form the date 1877. There is no decorative brick work associated with the window and door openings.

Windows and doors are grouped toward either end of the front elevation. Windows have narrow frames under wide wooden lintels. First story windows are flanked with pairs of two panel shutters while those at the second story have pairs of louvered shutters.

Entrances are located in the two center bays of the front elevation. They appear to be identical and have transoms above the doors.

A one story shed roofed porch shelters the four openings at the front elevation. The porch, supported by chamfered square posts, rests on stone piers enclosed with latticed woodwork.

The roof is sheathed with sheet metal and extends beyond the end walls ending with molded barge boards. Molding is also present at the eaves. Small brick chimneys with corbels at their tops are located inside each gable end.

North of the house are various outbuildings and a frame bank barn. The complex is in excellent condition and is located on a tract containing 64.79 acres.
