

ABSTRACT

WA-I-453

MASON-DIXON LINE: MILESTONE NO. 99(102)

1767 replacement (first set 1902)

Leitersburg, Maryland vicinity

Public/private

Milestone No. 99(102) marks (or approximately marks?) Mason and Dixon's 99th horizontal mile west of the northeast corner of Maryland, the beginning of their 230.228-mile West Line, later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. It is an original milestone of 1767, quarried and carved in England, of oolitic limestone, was used as a replacement for the milestone originally set at this site, and was first set in 1902 during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. It is unaltered but only in fairly good condition. If found to be at the site as redetermined in 1902, it is at the site preliminarily surveyed in 1765. It now stands <sup>firmly</sup> about 1 foot above ground level; measures close to 12 inches square; <sup>and</sup> ~~is~~ so weathered very little of its distinguishing embellishments remain: only the Roman capital letters P on the north side facing Pennsylvania and M on the south side facing Maryland, and some fluting on the south side. The top is now flat (no longer pyramidal with fluted planes) and mostly covered with cement, as though a repair of earlier damage; all top corners are chipped, particularly the northwest and southwest, as are all edges, and all margins are gone. On the national and state levels, No. 99(102) is significant primarily as one of 135 original monuments in the thematic group series of some 248 markers still defining the West Line. Locally, as one of 48 original monuments marking the present Washington/Franklin-Fulton county boundary (10 crownstones; 38 milestones), it is also significant as one of a diminishing number of objects and structures with a visually identifiable relationship to the colonial and Civil War heritage of these counties.

**ABSTRACT**

**WA-I-453**

**99th Mason-Dixon Line marker  
Leitersburg Vicinity  
public**

**1765**

**This 99th Mason-Dixon milestone is significant as one of the remaining original boundary markers planted by Charles Mason and Jeremiah Dixon who began work on the division line between Maryland and Delaware and Pennsylvania in 1764.**

**DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE**  
(if in the redetermined site of 1902)

Milestone No. 99(102)/marks Mason and Dixon's 99th horizontal mile west of the northeast corner of Maryland, the beginning of their 230.228-mile West Line. It is an original/<sup>milestone</sup>replacement of 1767, first set in 1902 at a redetermined original site during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. It is in fairly good condition, firmly set but leaning slightly to the northeast, <sup>and is</sup>unaltered.

The area here is rural, comparatively open farmland, scattered patches of deciduous woodlands, sparsely settled. The site is within Election District 9 of Washington County, MD; Washington Township of Franklin County, PA; about 2½ miles northwest of the town of Leitersburg,<sup>about 0.9 mile north of Jacob's Church Road,</sup> about 6 feet off the east edge of State Line Road/Leitersburg Road (T-359), in the level side yard of the Diller farm (about 100 feet northwest of their old stone barn), between two wood posts which serve to mark and protect it somewhat. It should be noted here that there is a discrepancy in locations of this monument on several maps: the site on the 1900-03 Resurvey engineer's <sup>Penn-DOT, 1980 Franklin County map</sup> map, and the MGS 1944 Washington County map is on the west side of the road; on the USGS Hagerstown quadrangle and MD-DOT map on the east side. (This will be traced in the follow-up Phase II of the present Mason-Dixon Line boundary marker project.)

According to the 1900-03 Resurvey (MGS Vol. 7, 1908, p. 89): "The monument placed here by Mason and Dixon had disappeared, having apparently been broken up, as small pieces of its peculiar material were found. The position was redetermined and another monument supplied. It stands by the road from Greencastle to Leitersburg." The replacement, as with all original Mason and Dixon West Line monuments, was quarried and carved in England, of oolitic limestone, and originally measured about 12 inches square by about 4½ feet long with a low pyramidal top, cut to stand as a post about 3 feet above ground, with the base left rough-cut for setting into the ground. The distinguishing embellishments are the vertical fluting with horizontally-fluted margins on all four sides, and the Roman capital letters P on the north side facing Pennsylvania and M on the south side facing Maryland, each V-sunk in the center of a plain shallow circle panel near the top. The replacement milestone still measures close to 12" square; stands about 1 foot above ground; has a flat rather than pyramidal top, most of which has been filled in with cement, as though to protect and repair from some earlier damage; and all surfaces are very weatherworn. The letters and most of the circle panels are fairly intact and clear; the top corners and edges are chipped, the southwest and northwest particularly; and no fluting or margins remain except on the south side (fluting only).

(see Thematic Group National Register nomination form for full descriptions o

STATEMENT OF SIGNIFICANCE

This 99th Mason-Dixon milestone is significant as one of the remaining original boundary markers planted by Charles Mason and Jeremiah Dixon who began work on the division line between Maryland and Delaware and Pennsylvania in 1764. The line was completed in 1767. The team crossed South Mountain and began working on the portion of the line forming the Northern boundary of Washington County on September 1, 1765. In 1768 the actual placing of stones was completed.

The running of the Mason-Dixon Line solved the boundary dispute which had plagued Maryland, Pennsylvania and Delaware. A temporary line had been run in 1739 which was approximately 225 perches north of the present line.<sup>1</sup> This line, however, apparently did not ease the dispute. The contested land between Maryland and Pennsylvania brought frequent clashes among residents in the area. One of the most famous leaders in the border fighting was Col. Thomas Cressap who was given the responsibility of holding the Maryland border by Lord Baltimore.

The Penns and Calvert, Lord Baltimore employed Charles Mason and Jeremiah Dixon of London to lay the boundary between Pennsylvania and Maryland and Delaware. These men and their team used sophisticated scientific methods to determine the course of the boundary. At each mile a stone was planted with an M and P incised into the appropriate surfaces. Five mile intervals were marked with larger, more elaborate crownstones which carried the Coats of Arms of the proprietors. The stones are said to have been cut in England. Although enough stones were imported to complete the line, they were not used in the rough mountainous areas because of transportation difficulties. Instead, high piles of native stones marked the miles in the mountains. According to T.J.C. Williams' History Of Washington County, the unused English stones were left at Fort Frederick near Clear Spring in Washington County.<sup>2</sup>
