Approximate date Ca. 1900-1910

Located on the east side of Village Mill Drive is this two story, three bay frame house covered with aluminum siding. The three bays are not evenly spaced across the front; instead two of them are offset toward the south side of the west (front) elevation. Windows have single pane sash. A one story projecting bay has been created from the south end of the front porch. The remainder of the porch is supported by turned posts and retains a standing seam roof. A brick chimney with a corbeled top is located inside the north gable end. A later brick flue is attached to the south gable end. The date attribution is based on the light frame construction, porch, small chimney and overall form of the house. It reflects Maugansville's conservative architecture of the early 20th century.
