Description of Property and Eligibility Determination: *(Use continuation sheet if necessary and attach map and photo)*

This 2-story, multi-gabled frame single family residence with an asymmetrical plan was built in 1919 according to the tax records. It is covered with synthetic siding and has a cement block chimney. The structure has a front facing gable that dominates the roof and a one-story full width porch with central pediment. The house may be the same structure that appears on the USGS map in 1912 in this location. Although located on the National Road in the crossroads community of Huyette; this house has been significantly altered and lacks sufficient integrity to be eligible for the National Register of Historic Places.

The property is not known to be associated with the lives of persons significant in the local, state, or national past Criteria B). The property does not embody the distinctive characteristics of a type; period or method of construction represent the work of a master; or possess high artistic values (criteria C). Finally, the property is not likely to yield information important in local, state, or national prehistory or history (criteria D).
