Location Design Setting Materials

Workmanship Feeling Association

Justification for decision: (Use continuation sheet if necessary and attach map)

Located 1/4 mile west of MD Route 66, just north of Mapleville in Washington, County, Beard Farm survives as a good, cohesive example of a mid-19th-century farm complex associated with the rural Mapleville community and its residents. The property is an important contributing resource to the National Register-eligible Mapleville Historic District.

The Beard Farm is a mid-19th-century farm complex consisting of a primary residence, a large bankbarn, a tenant house and several, non-contributing and substantial agricultural buildings. The dwelling and bank barn were likely built ca. 1850 for Peter Fahrney, Jr. the son of Dr. Peter Fahrney, a prominent physician who lived and worked just north of Mapleville, in an area known as San Mar (a.k.a. Sanmar) around 1800. The two-story, seven-bay brick dwelling is a good example of a Washington County farmhouse, historically characterized by a double-story recessed porch. Though the first story of this porch has been filled in, the alterations are reversible and have not compromised the original massing of the farmhouse.

The stone bank barn is a substantial agricultural building displaying a high quality of stone masonry. Although it has been altered by modern additions and surrounded by several contemporary agricultural buildings, these changes are not significant and have left the integrity of the original structure intact.

The two-story frame tenant house was built ca. 1900, a half-century after the primary residence and barn and is typical of its type.

Documentation on the property is presented in: Review and Compliance Files

DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE	
<p>This house is located about 1/4 mile west of Maryland Route 66 just north of Mapleville in Washington County, Maryland. It is situated on a rise of ground and faces east.</p> <p>The building is a seven-bay, two-story brick dwelling with white trim. Bricks at the front elevation are laid in all stretcher bond above coursed limestone foundations. Other walls are laid in common bond. Flat brick arches are present over all windows at the two main stories. A date stone set into the south gable wall reads "built by Peter Fahrney, 1852."</p> <p>Windows of the two main stories contain six-over-six pane sashes. Woodwork surrounding the sashes is narrow and finished with a bead. First story windows are longer than those at the second level. All are set on wide sills. Small four-light openings are located in the gables to light the attic.</p> <p>The main entrance is located in the second bay from the north end of the facade. The door, which is not original, is topped with a three-light transom and is flanked by paneled jambs. Other entrances are located at both levels of a recessed double porch. All are simply framed and topped with narrow transoms. Original doors have eight panels.</p> <p>An addition to the original double porch which was constructed under the main roof span in a small, modern one-bay entrance porch. A shed porch covers the rear entrance.</p> <p>The roof is of shingles and terminates with a barge finished with simple molding. The cornice is composed of slightly more elaborate molding. Brick chimneys with corbeled caps rise from inside each gable end and from the interior of the house.</p> <p>Alterations to the exterior of the house include a section of new brick-work enclosing a portion of the recessed porch, for the construction of a first floor bath.</p> <p>Near the house are two small brick outbuildings, one of which displays lattic work ventilators. Also present is a windmill.</p> <p>The large barn of coursed local fieldstone has a date plaque inscribed with Peter Fahrney's name and the year 1844.</p> <p>The buildings are in excellent condition. The property contains 146.65 acres.</p>

STATEMENT OF SIGNIFICANCE

The area of significance of this group of dwellings is their architecture. Dated examples of mid-19th century architecture, the house and barn provide an excellent record of Western Maryland's rural architecture of the period. Houses of five or more bays in length with recessed double porches are a significant architectural group in the area. Most date from the mid-19th century. The outbuildings are also significant examples as is the windmill for pumping water. Such mills are becoming rare in the area.

The structures were built by Peter Fahrney, Jr., who resided in the house until his death in 1855. Born in 1806, Peter Fahrney was the son of Doctor Peter Fahrney who began practicing medicine in the San Mar area around 1800. The property remained in the Fahrney family until 1940.
