Documentation on the property/district is presented in:

Maryland Inventory of Historic Properties Forms, WA-II-0230; and an excerpt from the lifestyle section of the Herald-Mail, from Hagerstown, Maryland, on June 28, 1998. The title of the article is: At Fort Frederick and Albert M. Powell Fish Hatchery, A home on public land, Department of Natural Resources offers residence-curatorship program. Written by Pat Schooley.

Description of Property and Eligibility Determination: *(Use continuation sheet if necessary and attach map and photo)*

The Foultz farmstead dates from the mid-Nineteenth century and consists of a farmhouse, built directly over a limestone cave with a running spring, a summer kitchen, a barn, and various other small outbuildings. Later in the Twentieth century the AM Powell Fish Hatchery was built on the property to take advantage of the pure spring water for raising fish. Most of these fish are released for stream stocking.

The house is constructed of rubble limestone, which historically has been a prominent building material and readily available in the Hagerstown area. Originally the house was I-shaped, however a later wood frame addition now creates an L-shaped plan. Much of the interior trim is intact, except for some later Victorian additions to the house such as the front porch. A Twentieth century concrete block addition was added to the north side of the house. Behind the farmhouse is a one-story wood frame summer kitchen. In front of the farmhouse is a large bank barn, constructed of wood frame, with a limestone foundation. A distinguishing feature of the barn is the semi-circular stone wall, which is still intact on the lower section of the barn, in the animal pen.

MARYLAND HISTORICAL TRUST
NR-ELIBILITY REVIEW FORM

Continuation Sheet No. 1

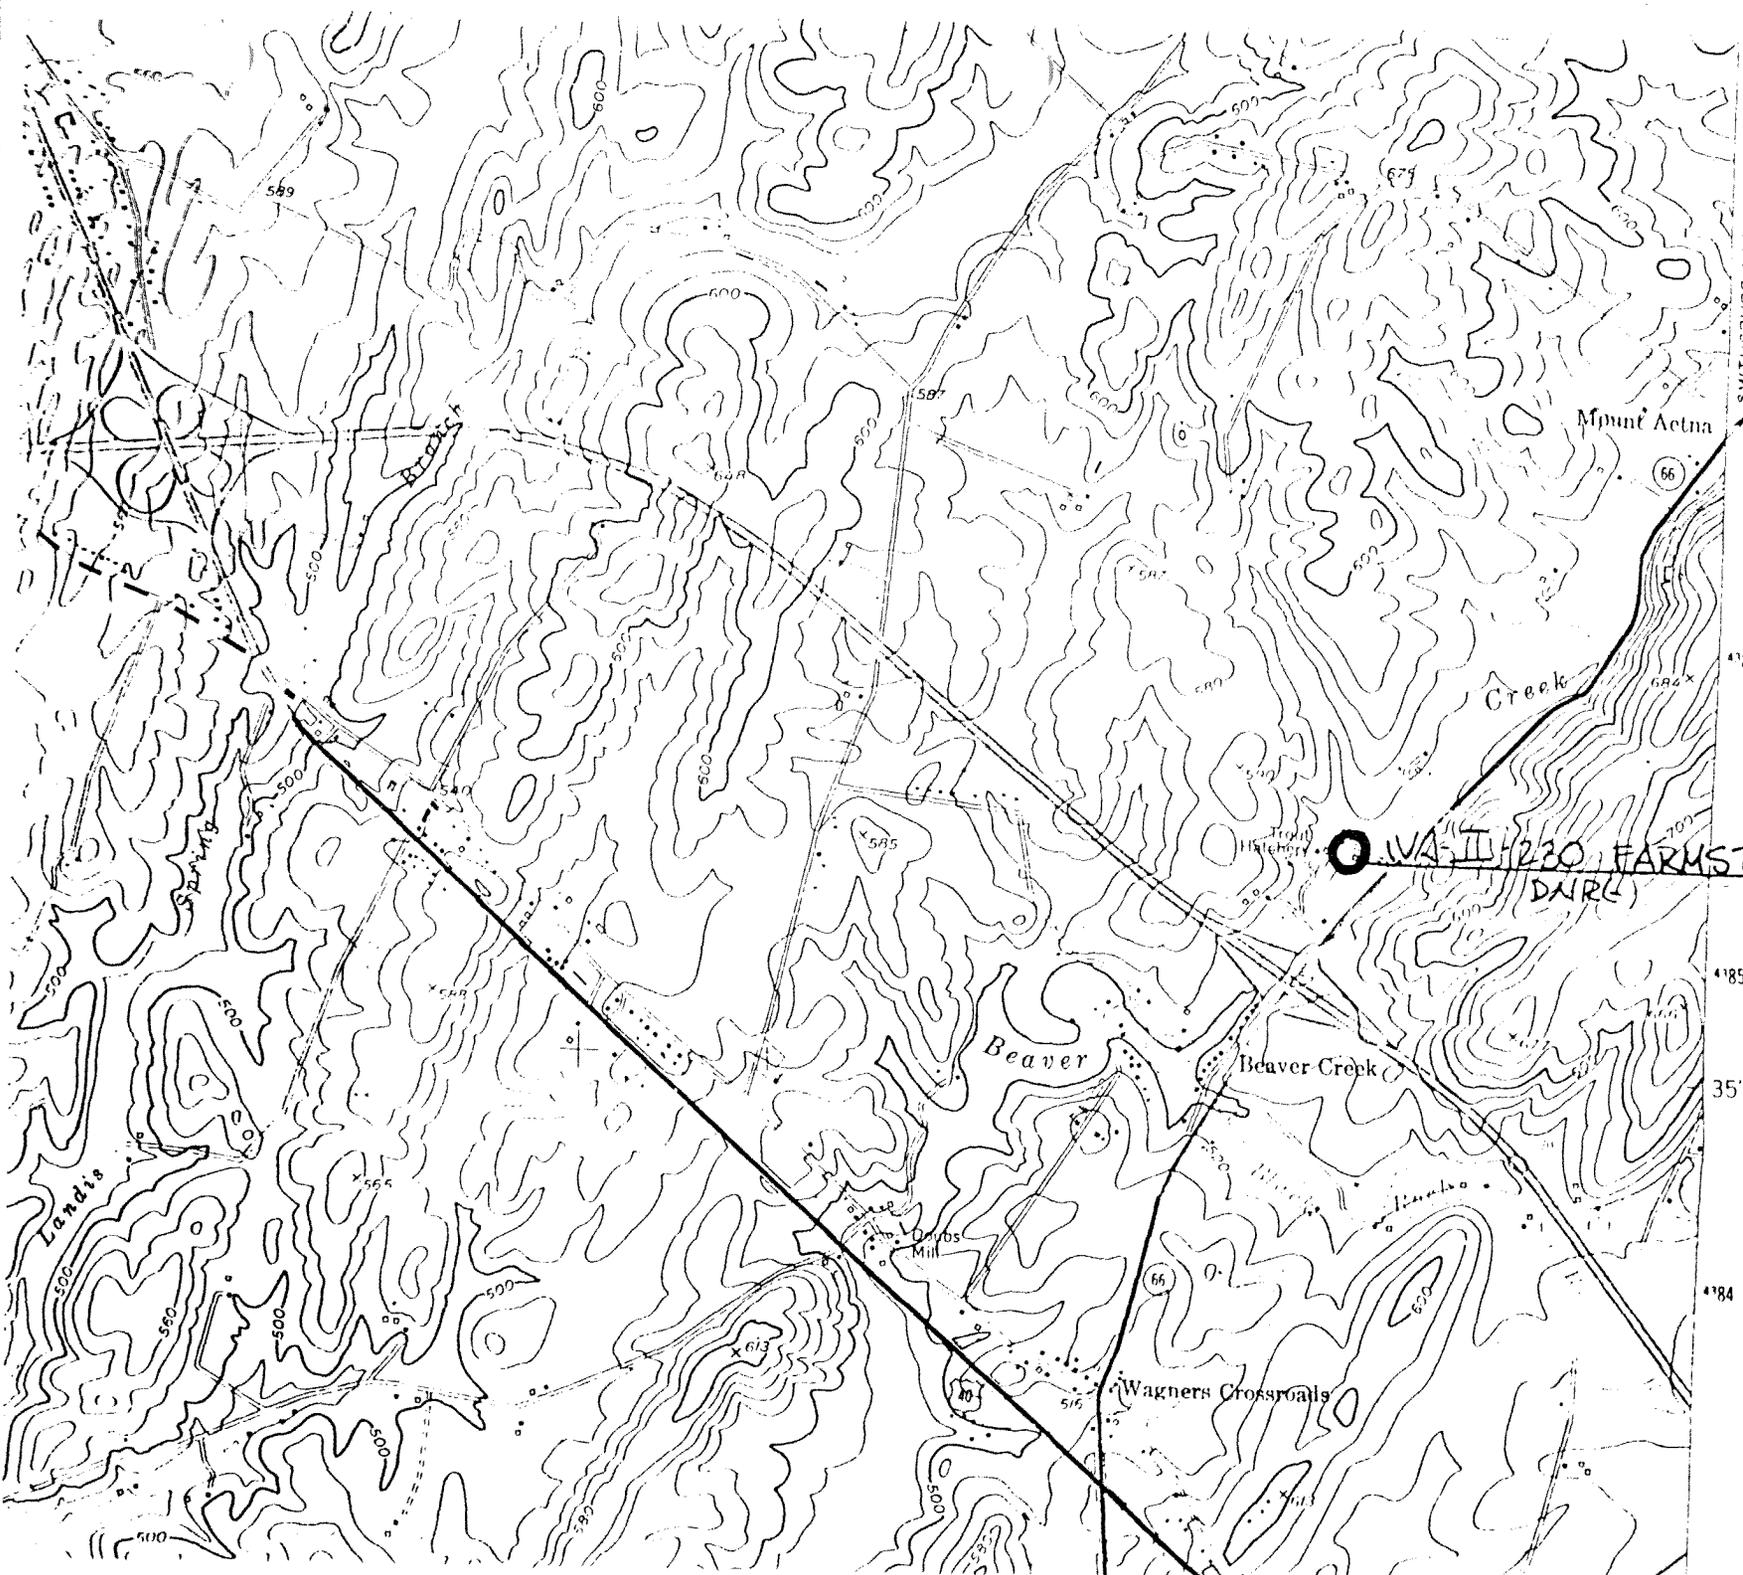

WA-II-230

"In 1795, John Foulz purchased a 196 acre tract from Joseph Odler for 1,078 pounds. This parcel contained parts of land patents named "Resurvey on Wallings Luck", "Resurvey on the Adventure", and "Convention". In 1849, two of John Foulz's heirs sold their shares to Henry Foulz, and the property remained in the family until the end of the century. Clifford Houpt and Bertie Martz bought their sister's share of the property in 1937, and it remained in that family until 1975 when Golda and Merle Martz sold the property to DNR while retaining a life estate". (Pat Schooley)

While the Foulz property has many of the distinct features of farm construction in Washington County, and while it is still relatively historically intact, after assessing the National Register criteria I have determined that at this time it does not quite meet the standards for National Register eligibility.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This farmhouse is located west of Maryland Route 66 a short distance north of I-70, southeast of Hagerstown in Washington County. It faces east.

The building is a two story, three bay dwelling built of rubble limestone. Forming an ell to the rear is a stone and frame two story extension. Windows and doors have narrow frames with broad wooden lintels. Most windows have pairs of shutters with movable louvers. The entrance is centered in the front elevation and includes a three light transom. A Victorian one story porch extends along the front elevation. Standing seam sheet metal covers the roof.

A frame bank barn is located south of the house. One of the most notable features about the barn is the curved fieldstone fence which encloses the barnyard. Most barnyard areas are rectangular, their perimeters formed by a three sided fence or wall and the front of the barn. This wall, made of roughly coursed local fieldstones laid with very little mortar, forms an arc across the front of the barnyard.

Other structures in the complex include numerous frame sheds and agricultural outbuildings. A German sided out kitchen with stone exposed chimney back appears to have been extended, possibly about the time that the rear wing was added to the main house.

STATEMENT OF SIGNIFICANCE

This farmstead consisting of a stone house, frame bank barn and outbuildings would appear to date from the second half of the 19th century. Although the house displays a relatively late use of limestone as a building material it does follow late 19th century building form.

The curved stone fence enclosing the barnyard is particularly significant because it is unusual among barnyard wall forms in this area.
