Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

This building, which has board and batten siding, is located near the east side of Cove Road, north of I-70 near Big Pool. The building sits alone on a small piece of cleared land, and faces west toward Cove Road. It is two stories high and gable roofed, with the ridge of the roof aligned parallel to the road. It is two bays wide by two deep; it has a doorway in its south gable end, and two windows per story on its west facade. The building, which is rather tall and narrow in proportions, is probably of frame construction.

Prepare both a summary paragraph of significance and a general statement of history and support.

This building is of interest architecturally for its board and batten siding, a type of siding which is very unusual in this area. The form of the building, tall and narrow with a side (south gable end) doorway, is also unusual in the area.

The building may be one of those shown on the 1877 Lake, Griffing, and Stevenson atlas of Washington County as part of a group of buildings labeled "Green Spring". This may refer to the Green Spring Furnace (founded in the mid-18th century) which during the mid-19th century was owned by J. B. Haines. Haines also owned other businesses in the Indian Springs/Big Pool area; a Haines building is shown opposite this building on the atlas. The unusual form of the building, as noted above, could be explained by possible former use as a commercial building rather than as a dwelling.
