

WI-405
Old Hebron Fire Department
Hebron
Private

1926

Standing in the center of Hebron is a two-story, red brick building that formerly housed the town's fire department. Centered on the front wall of the stretcher bond main facade is a large marble panel inscribed "Hebron Fire Department" and the date 1926. Now used as a car repair garage, the two-story structure is covered by a steeply pitched hip roof and lighted by six-over-one sash windows.

The fire department building, along with the old passenger station, are two distinctive structures that define the center of Hebron and date to its period of economic prosperity, which began around 1890 and lasted until the Great Depression. The two-story fire department building is of historical interest as a reflection of the size and type of structure erected for this purpose in a small rural town.

MARYLAND HISTORIC PRESERVATION PLAN INFORMATION

RESOURCE NAME: Hebron Fire Department

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Hebron Fire Department building stands on the south side of Railroad Avenue in the center of Hebron, Wicomico County, Maryland. The two-story, three-bay by five-bay brick building, now used as a garage, faces northeast with the ridge of the hip roof oriented on a northeast/southwest axis.

Dated to 1926, the three-bay by five-bay brick firehouse has a stretcher bond front wall and seven course common bond side walls. The two-story brick walls rise to a steeply pitched hip roof sheathed with asbestos shingles.

The northeast (main) facade is a symmetrical elevation with two garage doors defining the first floor. Fixed above the garage doors is a large marble tablet inscribed, "Hebron Fire Department, 1926." The second story is pierced by three evenly spaced six-over-one sash windows. Each of the window openings have rowlock sills. The base of the hip roof extends approximately two feet beyond the plane of the brick wall, and the cornice is boxed.

The north wall, laid in seven-course common bond, is five bays across with six-over-one sash windows lighting the first and second floors. A brick stove chimney rises against the north wall and pierces the eave of the hip roof.

The south wall, also laid in seven-course common bond, is pierced by a series of six-over-one sash windows on the first and second stories.

The interior was not seen.
